

The Dafo HotDog™, PattiBob™ and PollyWog™ family of products are high quality, off-shelf shoe inserts that provide biomechanical support for a wide range of needs. Available for both adult and pediatric applications, they provide a range of control levels and sensory feedback. Plantar surface contours include metatarsal, peroneal and longitudinal arches, and the DAFO signature toe elevation.

General Indications

- Normal tone requiring biomechanical support
- Low tone with very little hindfoot eversion
- Fully correctible flat feet
- Mild pronation
- Developmental delay
- Locomotor delay
- Down Syndrome
- Used contralaterally with single brace for consistent shoe sizing, shoe depth and sensory feedback

HotDog Minimum support

- Laminated dense foam
- Full length minimum support with partial heel cup
- Optional foam arch fill available

PattiBob Moderate support

- One layer foam supported by semi-rigid plastic
- Full length moderate support with partial heel cup
- Optional foam arch fill available

PollyWog Maximum support

- One layer foam supported by semi-rigid plastic
- Plantar surface control with soft toe lever
- Partial wrap of mid-foot and full heel cup
